

PIPER'S SUPERIOR FOUNDATION

Featured on our toughest racks: Two 14 gauge aluminized steel reinforcing channels support our .090" thick aluminum bottom panel. The edges are formed and rolled to create a built-in bumper and heavy duty plate casters make this the strongest foundation in the industry.

540

When work loads increase and you need more cabinets, Econoline Cabinets from Piper Products may be just the thing. Built to demanding Piper specifications, these cabinets provide most of the same great features found on our heavy-duty cabinets. Though constructed without some of the cosmetic enhancements and touches of our standard cabinets, the Econoline series still provides the service and reliability you've come to expect from all Piper products. They are offered in three of our most popular sizes to work flawlessly along side your other equipment.

STANDARD FEATURES

- Base is a solid bottom constructed of .090" aluminum, rolled edge acts as built in bumper
- Two 14-gauge aluminized steel reinforcing channels attach the casters and support the bottom panel
- Frame consist of four extruded channels 1-1/2" x 5/8" x .094" aluminum. Corners have .190 channel supports for reinforcement
- Single pan top constructed of one .080" thick aluminum panel, fully welded corners
- Glides are channels spaced on 1-1/2" centers with 5/8" ledge, .090 thick extruded aluminum continuously welded to the frame
- Door panel is .125" PVC coated aluminum attached to cabinet with bakery hinges, 270 degree door swing with card clip
- Back panel is .080" aluminum fully welded XR 1/2" extruded aluminum tie bar keeps cabinet square
- 16-gauge stainless steel positive gravity latch is provided to keep door closed during transport
- Stainless steel side door latch holds door open
- Card clip, easy identification of cabinet content when door is closed
